

# Noted - Project Documentation

## Project Overview

**Noted** is a simple and elegant productivity app developed using Swift.

It combines essential productivity features — To-Do list, Reminders, and Schedule — into one clean and minimalistic interface.

It's designed to help users stay organized and focused on their daily goals without any distractions.

---

## Features

-  **To-Do List:** Easily add, edit, and delete tasks.
  -  **Reminders:** Set custom reminders for important tasks.
  -  **Schedule:** Organize tasks by date and view them in a structured format.
- 

## Technologies Used

-  **Swift**
  -  **UIKit** or **SwiftUI** (*based on implementation*)
  -  **Auto Layout** for responsive design
  -  **UserDefaults** or **CoreData** for local data storage
- 

## Project Structure
